

Unit comparison worksheet — 2.5 ton gas/electric package unit

301 S Aztec Dr, White House, TN 37188 · design airflow 995 CFM · single phase 208/230 V · figures taken from each manufacturer's published product data and warranty certificate

Specification	Carrier 48NL-B300603	Ruud RGEAYB030AJT	YOUR PROPOSED UNIT — please fill in
Full model number	48NL-B300603	RGEAYB030AJT (+ burner size)	
Refrigerant	R-454B	R-454B	
Cooling, AHRI net	28,800 Btu/h at 950 CFM	28,400 Btu/h at 980 CFM	
SEER2 / EER2	13.4 / 11.05	13.4 / 10.6	
Gas heat, input → output	60,000 → 49,000	60,000 → 48,000 · 80,000 → 65,000 option	
AFUE	81%	81%	
Heat exchanger material	Stainless steel, standard	Factory standard is NOT stainless. Stainless is factory option AJA — model must end in AJA	
Heat exchanger warranty	20 yr, LIFETIME if registered in 90 days	Factory standard 10 yr. Stainless, 1-phase residential, registered: limited lifetime	
Parts warranty	5 yr, 10 yr registered	5 yr, 10 yr registered	
Compressor	Scroll · 5 yr, 10 yr registered	Scroll · 10 yr, no registration needed	
Refrigerant metering	Fixed orifice	TXV	
Outdoor coil	Copper tube, 1 row, 13.6 sq ft	All-aluminum microchannel, 1 row, 7.06 sq ft	
Indoor coil	All aluminum, 3 rows, 3.7 sq ft	All-aluminum microchannel, 1 row, 3.54 sq ft	
Indoor blower	ECM, 1/2 hp	Constant-torque ECM type, 1/2 hp	
Sound (AHRI 270)	73 dBA	79 dB	
Cabinet / base	Composite base pan, will not rust; zinc-coated prepainted steel, 500-hour salt spray	Rugged base rail, powder-coat paint; no salt-spray figure published	
Refrigerant leak sensor	Yes, factory leak-dissipation system	None at 2.5 ton (charge is under the threshold)	
Factory charge	4.85 lb	2.9 lb	
Cabinet size / weight	47 x 48 in, 43 in tall, 337 lb	47.5 x 52.4 in, 36 in tall, 384-394 lb	
Where is your unit BETTER than these two?	—	—	

STAINLESS STEEL HEAT EXCHANGER IS REQUIRED — an aluminized or "factory standard" exchanger will not be considered. If stainless is a factory option on your unit, quote it with the option and give the full model number including the option code.

Why I am sending this: I am not tied to either unit. If you propose something different, fill in the right-hand column so the three can be compared on the same lines. Anything left blank I have to treat as unknown. Please use your manufacturer's published figures rather than a sales sheet.
