

FLOOR PLAN — DEVICE KEY MARKUP

WRITE THE NUMBERS ON

MARKUP SHEET · 22 SEP 2026

BASE GEOMETRY: SHARKY LIDAR, AUG 13

Rooms only — all guessed device positions removed. Write each key number on the plan where that device actually lives, then hand it back and I will redraw it properly.

Not to scale · geometry approximated from the vacuum's LIDAR map · rooms it could not enter are hatched

DEVICE KEY — WRITE THESE NUMBERS ON THE PLAN

Rough is fine. Which room, and which wall, is what matters. If something is outside, put the number outside the wall line.

CORE BOXES

- 1 Beehive control box (HA hub) .66
- 2 BGW320 gateway / modem .254 (you said master bedroom)
- 3 RE200 wired access point .196 (you said office)
- 4 The Beast / 301Server .194
- 5 Cat6 drop the RE200 plugs into — mark the run if you know it

OUTSIDE

- 6 B-hyve "Water Hog" irrigation timer .187 (office outside wall)
- 7 Mailbox sensor — and the mailbox itself
- 8 A/C unit + its pad
- 9 Water meter 10 Gas meter 11 RTL-SDR antenna
- 12 The six outdoor / indoor security units

MACHINES & SCREENS

- 13 GarageLaptop (Lenovo) .173 14 HP TouchSmart → Kitchen PC .121
- 15 Wall iPad 16 Office printer .208
- 17 Fire TV .215 18 Apple TV 19 Roku
- 20 Sharky's dock

ZIGBEE RADIOS

- **21** Garage Repeater **22** Floating Repeater
23 301 Alarm siren

ZIGBEE SENSORS

- **24** Front door **25** Back deck door
- **26** Garage man door **27** Garage door down
28 Spare Contact 1
- **29** Kitchen sink leak **30** Kitchen fridge leak
31 Guest bath leak

SWITCHES & RELAYS

- **32** Kasa dimmer — bedroom **33** Kasa dimmer — kitchen/dining
- **34** Kasa dimmer — living room **35** Garage light switch
- **36** Garage door opener relay **37** A/C relay
38 Thermostat

Also mark, if you can: where the **garage** really sits relative to the kitchen and living room (the base drawing says “position approximate”), and the true shape of the **office** and **guest bedroom** — Sharky never mapped those two because the doors were shut, so they are drawn as guesses.
