

FLOOR PLAN — REV C

FIXTURES ADDED

REV C · 22 SEP 2026 · TO SCALE
ANCHORED ON THE 12×24 GARAGE

Adds the fixtures from your markup — appliances, fan, bell, outlet, deck door — plus **the Beast in the master bedroom**, and corrects the back deck to **open** rather than covered.

ADDED IN REV C

- **THE BEAST IS IN THE MASTER BEDROOM** — the same room as the gateway. That was not written down anywhere.
- Front porch:** outlet and bell, and it is **COVERED**
- Laundry:** washer and dryer, across from each other
- Kitchen:** stove, refrigerator, sink, bar
- Living room:** ceiling fan, and the **back deck door**
- Back deck is OPEN**, not covered — corrected
- Outside the east wall:** A/C unit, and the B-hyve control box + irrigation

Why the Beast's location matters

more than it looks. It sits in the master bedroom with the gateway — the far end of the house from the office. So the machine doing the heavy lifting and the router the B-hyve wrongly attached itself to are in the same room, and both are about as far from the irrigation timer as anything in this house can be.

TOTALS

- House **44 × 32 = 1,408 sf** against the recorded 1,400
- Garage **12 × 24 = 288 sf** — your measurement, the ruler for everything

else

Still open:

- **● Where is the 3rd bedroom?**
Record says 3 bed / 2 bath; I can place only master + guest.
- **OFFICE at 11×19 = 209 sf** — large for an office. Is that right?
- Does the **hall** really run 18 ft east?
- Fixtures are in the right rooms but only roughly positioned — move them if the wall matters.

Next: shell first, then the 38-number device key.
