

Floor Plan — Rev R

MEASURED

REV R · 22 SEP 2026 10:46 AM
DRAWN ON LASER MEASUREMENTS

The first version of this plan drawn on **real geometry**. The outline is traced from your perimeter walk, which **closes in both directions to within inches. It is not a rectangle — and it never was.**

✓ **The shell is no longer a guess.** Every heavy line came off the GLM 20. The three steps that were on no previous revision are all here: the **kitchen bumping out 5'7"**, the **porch recess 3'8" deep**, and the **garage front set back 4'6"** with its door in the **west** wall.

ROOM	SIZE	FLOOR sf	WALL sf
Living room	14×17	238	496
Kitchen / dining	16×13	208	464
Master bed	15×11	165	416
Office / Bed 3	10×13	130	368
Master bath	15×8	120	368
Guest bed	11×10	110	336
Foyer	8×6	48	224
Guest bath (derived)	10×8.5	85	296
Garage	24×13	312	592

🔧 **You are right that this should have come first — and here is the payoff already.** Those last two columns are what you just asked for. **Paint a room:** wall area is there (at 8 ft ceilings; the master bedroom is vaulted so it will run more). **Flooring:** floor area. **Gutters:** the eave runs are **39'5" across the front and 58'6" across the back**, so about **98 ft of gutter** plus downspouts. Ask me any of those and it is now arithmetic instead of a guess.

⚠ **What is still mine, not yours.** The shell is measured; **where the rooms sit inside it is still fitted.** I have the room sizes but not their positions, so I have placed them against your corrections and the Sharky topology. **The dashed guest bath is arithmetic off your 26'6" chain, not a measurement.** Check the arrangement — the outside walls are right.

→ **What I need from you to finish it:** just **which room is next to which** — no more tape. Walk the house and tell me the order, e.g. "out of the foyer,

living room is straight ahead, kitchen on the left, hall to the right.” The sizes are settled; only the jigsaw is open.

Coming next, as you asked: the 67-item device key re-issued on this shell, then the **ductwork drawing reworked** — and yes, **the runs scale straight off this plan now** instead of being estimated, which is exactly what Manual D wants.
