

Device Mark-Up Copy

WRITE ON ME

MARK-UP · 22 SEP 2026 11:39 AM
MEASURED SHELL · 15.5 PX PER FOOT

Green = laser-measured. Orange = fitted by me. Outline from your perimeter walk — closes both directions to within inches. **The west half is closed and self-verifying.**

✓ **THE WEST HALF IS DONE.** Two independent checks, neither forced:

Depth: bed 11 + bath 8 + laundry 3 + kitchen 13 = **35.0** vs measured **34.83** — **two inches**.

Width: shower run 8', laundry **7'11"** — **one inch**, which is what "right behind the washing machine" has to mean.

West wall: 5' master bedroom → jog at the downspout → 3' toilet closet → garage door. Your 8', confirmed at the corner.

Device Key

67 ITEMS

Write these numbers onto the map on the previous page. Cross out anything you cannot place; add anything missing at the bottom and I will number it.

---	---	---

⚠ ⚠ THE EAST HALF IS BLANK ON PURPOSE.
The four rooms that go there **provably do not fit** the way I had been drawing them:
kitchen 16 + living 14 + office 10 = **40 ft** across a **39'5"** house
guest bed 10 + office 13 + bath 8½ = **31'6"** against a **29'3"** east wall
I drew them overlapping each other on the last sheet rather than admit that. That was wrong. Sketch the walls in that box and I will take every other dimension off it.

→ **Write each number where that device actually is, send it back, and the ductwork drawing gets reworked with the runs scaled off this plan instead of estimated.**
